Education

2007 – 2015 **KAIST, B.A.**, Dept. Electrical Engineering, Daejeon, South Korea

Career Experience

2020 – 2021 **NLP Engineer**, Boin IT, Seoul, South Korea

- Role 1: Implementation of a natural language book search function
- Role 2: Database Building, Pretraining, Finetuning for Korea LLM Model with various cutting edge LLM Models (BERT, GPT3, T5, etc)

2018 – 2019 **Research Engineer**, SMP3, Seoul, South Korea

- Consulting on specific efficiency measures such as replacement, repair, and relocation of industrial plant equipment

Research Experience

2009.06 – 2009.08 **Undergraduate Research Assistant**, KIST, Seoul, South Korea

- Role: Simulation for thermal, electromagnetic wave absorbing film
- Simulation Program: Ansys HFSS, Ansys Maxwell

Technical Skills

Python (PyTorch, Pandas, Matplotlib, etc)

JavaScript and Web Development

Research Interest

Computational Neuroscience, Active Inference, Neural Representation, Spatiotemporal Representation, Implicit Learning, Decision Making, Adult Neurogenesis, Memory Formation and Neuroplasticity, Interoception, Neuroscience of Emotion
